Figure Sequences

Complete the next two matrices in each sequence.
47 easy, 46 moderate and 47 high-difficulty series.

47	46	47
EASY	MODERATE	HIGH

Questions first. Answer key and worked solutions at the back.

Instructions and timed-practice tracker p. 2
Practice questions p. 3
Answer key p. 73
Worked solutions p. 74

Original practice questions following the formats and rule types in your uploaded dMAT General Academic Module preparation guide (07.07.2026). This is independent practice material, not an official examination paper.

Difficulty labels describe the intended practice progression; they are not official calibrated difficulty ratings.

Core Module **Figure Sequences**

Instructions

Each question shows four 4 × 4 matrices. Continue the same rules to find the next two matrices. Each complete series is one question, with two responses.

Under each question mark are three choices: Matrix 1 at the top, Matrix 2 in the middle and Matrix 3 at the bottom. Choose independently for Image 1 and Image 2.

Figures can move horizontally, vertically or diagonally; follow a boundary or a small loop; change colour; and rotate. A diagonal track keeps the same diagonal direction and retraces it at a boundary. Figures never disappear, overlap in a matrix, or leave the grid.

Some changes increase by one from one transition to the next: for example, 1, 2, 3, 4, then 5 movement steps, or 90, 180, 270, 360, then 450 degrees of rotation. A full 360-degree turn returns to the same orientation.

Use colour viewing or colour printing: colour carries information. Rows are counted from top to bottom and columns from left to right in the solutions.

The reference allows 25 minutes for 20 questions in this subtest and does not allow notes. First learn the methods, then use the seven 20-question blocks below for timed practice without working notes.

Timed-practice tracker

Block	Questions	Time	Correct	Retry
1	1-20	_____ min	_____ / 20	_____
2	21-40	_____ min	_____ / 20	_____
3	41-60	_____ min	_____ / 20	_____
4	61-80	_____ min	_____ / 20	_____
5	81-100	_____ min	_____ / 20	_____
6	101-120	_____ min	_____ / 20	_____
7	121-140	_____ min	_____ / 20	_____

For this tracker, count a series as correct only when both responses are correct. This is a practice convention, not a statement about official scoring.
